Conquer the freelancing marketplaces

REVIEW

HISTORY

Meets Specifications

Hello Khaled,

I really appreciate the time and effort spent on this amazing submission.

Your LinkedIn profile and the freelancing profiles show off a great potential in **Data Analysis!**

I liked how well your previous experience is listed along with your skills and education. The overall view says that you're on your way to being a great **Data Analyst**.

I've added suggestions for further improvements. And I strongly recommend going through them so that you can have better adherence online. You can also read [this article](#) written by an experienced freelancer on Fiverr.

It's also worth mentioning that Guru has an interesting [Blog](#) section where you'll find helpful articles that can support you in your journey.

I wish you all the best in what's coming next.

Stay Safe,

Your Reviewer,

Please don't forget to rate this review, your feedback matters.

LinkedIn profile completion level

1. Make sure the name and profile picture are not trivial.
2. No typos in the official name
3. The student follows the grammatical and functional rules of writing his/her name

4. The profile picture is clear and in high-resolution HD

Nice work so far!

- Your Profile Picture is suitable. However, your name should be reformatted by typing only the first characters in upper case as shown below:

Khaled Moahmed Fathalla

1. Profile summary must be authentic, not copied from the internet
2. Profile summary must reflect the student's cumulative experience and educational journey

Nice work so far Khaled!

- Your Profile Summary reflects your Cumulative Experience.
- According to this specification, you should also talk about your Educational Journey.
- Please talk about your Educational Journey in learning the skills set you currently have.
- [Here's](#) a good resource that can help in making your **Profile Summary** stand out.

1. Must complete role title (start date, end date, month location, company)
2. Must enlist tasks and activities, not more than 5 bullet points

Great Job!

- You've added all of the required details to the roles you've taken.

1. Education steps must be enlisted from the newest to the oldest chronologically
2. Add all certifications gained if available
3. Add relevant skills according to his/her specialty

Great Job!

- You've added your education details from **Alexandria University** and your skills.

Suggestions

- You can add the certificates you had earned to the relevant section on your LinkedIn profile. [Here](#) you can find how to do this.
- You can also add the courses you've taken in the courses section as explained [Here](#).

Freelancing profiles completion level

1. Make sure the name and profile picture are not trivial.
2. No typos in the official name
3. The student follows the grammatical and functional rules of writing his/her name
4. The profile picture is clear and in high-resolution HD

Nice work!

- Your Profile Picture is suitable on both platforms.
- However, your name is well-formatted only on Freelancer.com
- Please make sure to reformat your name on Guru and peopleperhour so that only the first characters can be typed in upper case.

1. Profile summary must be authentic, not copied from the internet
2. Profile summary must reflect the student's cumulative experience and educational journey

Awesome!

- Your Profile Summaries on peopleperhour and Guru are excellent!
- Please add a Profile Summary to your Guru account that reflects the same information by going to **Edit Profile -> About -> Overview -> Add your profile summary in the Bio section.**

Illustration

The screenshot shows the guru platform's profile editing interface. At the top, there's a navigation bar with 'guru' logo, search bar, and links for Dashboard, Find Work, Jobs, and Payments. A context menu is open on the right, with 'Edit Profile' highlighted. The main content area is titled 'Edit Profile' and contains sections for 'Edit About Info' and 'Public Identity'. Under 'Public Identity', there are fields for Screen Name (with a URL below), Website Link, Professional Video Link, Facebook Link, and LinkedIn Link. A 'Save' button is at the bottom. Below this is an 'Overview' section where the user is identified as 'An Individual'. There's a 'Bio' field with a character count of 1740 left, outlined in green. A green checkmark icon is positioned above the Bio field.

- ✓
1. Must complete role title (start date, end date, month location, company)
 2. Must enlist tasks and activities, not more than 5 bullet points

- ✓
1. Education steps must be enlisted from the newest to the oldest chronologically
 2. Add all certifications gained if available
 3. Add relevant skills according to his/her specialty

✓
No need to mention the original country of residence, the project owner wants to know your current resident area to count the difference in timezones

✓
Start with \$5-10/hr as a beginner freelancer, the more you complete gigs and gain more experience, the more you can ask for your hourly rate in the future

Good Start!

Note

- Always keep your prices up-to-date with the industry average. Not too high so that clients don't think your services are too expensive. And not too low because they might think that they'll get low quality. [Here's](#) a great guide you can use.

Projects proposal

✓
Correct example: Dear john
Incorrect examples: Dear sir/madam, Dear XXXX

Nice work!

- You've professionally started your proposals with **Dear + The clients' names**.

✓
Copy and paste your proposals into the second Word file. Don't add a link that redirects to your marketplace submission. Udacity reviewers won't be able to see your submission

✓
A quick introduction that doesn't takes no longer than 3 lines

Nice intros!

- They're efficient and they perfectly demonstrate your skills and experience in **Data Analysis**. However, we recommend customizing each proposal based on the project you're applying on by only mentioning the relevant skills and expertise that each client needs.

1. List all relevant and similar projects you worked before
2. Don't list all of your work experience

Great Job!

- You've mentioned similar projects you had worked on.

Suggestion

- Please add a direct link or samples of each project you mention in your proposals so that the clients can be sure that you've worked on these projects.

1. Steps to be mentioned in bullet points not in a paragraph
2. The project implementation model must follow the project owner's timeline

- In each proposal, you should mention **The Implementation Model** you'll follow to accomplish the required task/s. These steps should be listed in bullet points.

Example

Dear Mr. Michael.

By virtue of the fact that the project targets the LaTeX platform and this is my area of expertise, I will be able to bring out the project in the best possible way in terms of writing and also in terms of design. As for writing, I will write the project in LaTeX, and from the design side I will follow the directions issued by Google to develop the interfaces.

I have been working in the field of scientific writing for one year. I also follow the latest technologies and development methods in all my projects, and I have knowledge in Information security enables me to build safe and high quality scientific papers.

In the attachments you will find samples of my previous works, and some designs for projects that I have uploaded to research gate.

- Depending on the characteristics required in the project, the implementation of the project may take five working days,

- *Writing the research on LaTeX will take 1 day*
- *Design the research format will take 1 day*
- *Making data analysis for the research will take 2 days*
- *Exporting the research and revise it will take one day*

- The cost of my working day is \$ 10, and accordingly the project may cost \$ 50, and the project may take me 5 working days, and after the project there will be support A technician to apply in the event of any problems for a period of week without additional amounts due to my keenness and commitment to make the project appear in the best possible way that represents the company.

If any of the above sounds interesting, let me know when you'd be available to talk this week.

Thank you for your time reading the job offer, and I look forward to working with you as soon as possible.

- There's a huge difference between the objectives and the implementation model.
- The Objectives are already known by the client. The Implementation is your input to make the client's project succeed.

1. The proposal must contain the bidding amount
2. The student must be reasonable while setting his/her bidding amount

Great Job!

- You've added the bidding amount in both proposals. Although there's a specific section on each website for the amount you're asking for, confirming the amount in the proposal is always a good practice.
