As I have understood, you did not get the exact way of fulfilling this specification. You mentioned your job role and everything except the tasks which you perform under this role.

No worries at all. Let me describe this to you. You need to enlist some activities in your job role in LinkedIn. This you have to do in bullet points. See the example below.

Suggestion:
It's not always you start from very low. But adjust your bidding amount based on your experience and the client's average asking price. With more work experience and completion of the project slowly you can increase your proposal price.

Sometimes you won't get the name of the client, so using salutations like 'Hello there!' sounds fine and professional. The world 'Hi there!' is alright but it is recommended to start out with Dear or Hello as it sounds more formal/traditional.
